

SWEDWOOD RUSSIA CONTROLLED WOOD COMMITMENT FOR FORESTRY DEPARTMENTS

Company guarantees to control its wood sources (related to the controlled wood), in order to exclude the categories outlined in FSC-STD-30-010 FSC standard for forest managers supplying controlled wood:

- Wood harvested from forest areas where traditional or civil rights are violated
- Wood harvested from non FSC-certified forest areas having high conservation values which are threatened (any of the high conservation values that are present)
- Wood harvested from genetically modified (GM) trees
- Illegally harvested wood
- Natural forest that has been converted to plantations or non-forest use

This policy on controlled wood will be revised according to FSC standard changes.

Approved:

Clas Bostrom

Director of forestry

Swedwood International AB
