

SWEDWOOD RUSSIA ENVIRONMENTAL POLICY FOR FORESTRY DEPARTMENTS

ENVIRONMENTAL POLICY GOAL

Achievement of sustainable forestry within Swedwood Group (Russian Companies) in order to preserve nature heritage for next generations. In its operations Swedwood Russia has integrated forestry and industry departments. The role of own forest and purchasing of wood secure a long term supply to own industry at competitive cost.

The company goal will be reached by running sustainable forest management, which means that Swedwood companies:

1. Comply with forestry legislation and operate according to FSC principles including chain of custody requirements
2. Do not use the wood from specially protected nature areas and contribute to their identification (all types of high conservation value forests) and preserving
3. Follow the principles of inexhaustible forestry with and strive for reducing negative logging consequences
4. Strive for creating opportunities for employment based on sound economic development which also will contribute to social benefits of local communities
5. Company will makes its policy transparent and available to all interested parties
